

Francis Cable Systems Armored Cable-90°™

Francis Cable Systems delivers only the highest quality armored cable that meets standards set by Underwriters Laboratories. Each coil bears the UL label and meets Federal Specifications AA-59544. Armored cable is a safe, modern and economical alternative to EMT and wire, or greenfield and wire for commercial, residential and industrial applications. Fire-safety is enhanced because the wires are encased in a metal jacket which also serves as an additional ground-fault path (along with the separate bonding wire running underneath the armor).

Francis Cable Systems armored cables are manufactured with the “Mark of Excellence”™

- UL listed and labeled (Standard #4 Type ACTHH 90°)
- Article 320 of NEC approved wiring method
- Commercial, residential, and industrial applications
- Cable tray rated
- Crush resistant, penetration resistant, rodent proof
- Can be used for hard-wiring lighting fixtures and high-temperature conditions up to 90°C
- Easy installation, consistent color coding, ideal for rewiring
- Made in the U.S.A. fully pre-assembled and inspected

Armored Cable applications:

- Construction sites—office and commercial buildings, industrial plants, residential housing, and multifamily apartments.
- Reconstruction, renovations, and rehabilitation projects.
- Above suspended ceilings and under-floor wiring, 90°C rated fixtures.
